English	By keeping the track of the outgoing student progression, the teachers of the department evaluate the attainment of the POs and COs. The teachers are continuously in contact with the pass out students. Various student-centric activities are organized by the department to enhance their learning skills like listening, speaking, reading and writing	 
Music (I)	Through Practical Sessions	
Physics	<p>The students after completing course at graduation level in Physics will develop an understanding of major concepts and certain theories which are used by the physicists. Most of the concepts/theories were experimentally tested numerous times and found to be an adequate approximation of nature. Physics uses mathematics to organize and formulate experimental results. By doing Physics practical's, students can enhance their problem solving ability.</p> <p>In Course, students will learn about classical mechanics, electricity and magnetism, electronics, solid state physics, computer programming, statistical physics, wave and optics, quantum etc. All these develop a basis for future learning and work experience. Students will have a lot of opportunities in research area.</p> <p>During the course study, students were also motivated to work effectively in diverse teams. They understand the techniques of different measuring tool and techniques involved in measurement and evaluation. Students also improve their communication skills.</p>	
History	Measurement of attainment of POs and COs is done through formative and summative methods. Continuous and comprehensive evaluation is done regularly to know the attainment. Class tests are scheduled by the teachers and after the valuation the analysis is done after which the strategy for improvement is made.	
Chemistry	Program outcomes attainment is evaluated by the improvement observed in the students During and after the competition of every semester by the classroom learning outcomes, performance in activities like essay writing, poster making, science exhibition, quizzes etc.
